CORNERSTONE
1986-87

Access...

Access. The Webster's New Collegiate Dictionary defines the term as a way or means of access; the action of going to or reaching an increase by addition.

Florence-Darlington Technical College is an access. It's an access to your career your future to all areas. More than thirty degree and diploma programs are available from three divisions — the division of business and general studies, the division of health studies and the division of technological studies. As you seek to learn career skills for your future success, Florence-Darlington Technical College can meet your educational needs by preparing you for the challenges you will face in the upcoming years.

Yes, Florence-Darlington Technical College provides an access an access to all areas.

President Fore discusses expansion plans for the college. Under construction now is the 7000 Building, which will house the Engineering Technology curricula and a Learning Resources Center.

President Fore takes a break from his busy schedule to enjoy photographs of his daughters Lee and Lori. While Mr. Fore is an avid hunter, his daughters have been horse enthusiasts all of their lives.

STUDENT LIFE

Access

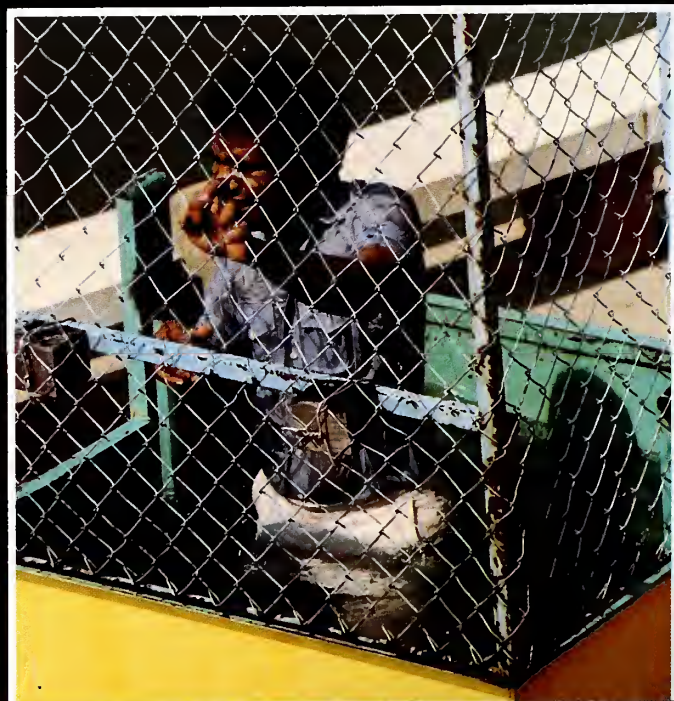

Every fall the Student Government Association is busy with a whirlwind of activities for the campus. These activities range from special entertainment to the annual fall bash. FUN? Of Course.

It's a time to get reacquainted with the old and acquainted with the new at the fall bash. And what can be more fun than relay games, tug-of-war and the dunkin' booth? Especially when the dunkin' booth has Cecil Ridgill, Darrel Staat and David Barr as its guests of honor.

In addition, the SGA had a free hot dog day. It is almost impossible to believe, but they served 300 hot dogs in less than thirty minutes!

Yes, every fall it's busy and Tech and the SGA plan to see that it stays that way.

BREAKING THE ICE DURING FALL ACTIVITIES

TRICK OR TREAT

Most Americans agree that Halloween is one of their favorite holidays during the year. Why? Maybe it's because everyone loves a party, and at Halloween there seems to be a party on every block. In addition, Halloween gives everyone an opportunity to dress up as they wish. Whether you choose to become a traditional witch, ghost or goblin or if you decide to get all wrapped up in things and become a mummy, it really doesn't matter.

At Tech, the program board sponsors an annual Halloween Happening. The student lounge is transformed into an atmosphere befitting any Dracula or Frankenstein. In addition, there are activities for everyone including a pie throw, pumpkin carving and a costume contest. And at the Halloween Happening in October, "Bartels and James" even showed up at the pumpkin decorating contest. The DPMA club won this contest with their entry of "Bartels and James." Was that Noah Henley dressed as a nun?

For two hours students participated in contests, won prize money and ate hotdogs. And for two hours everyone had fun! Until next year

STUDENT GOVERNMENT

PUTTING IT ALL TOGETHER

Members of the Student Government Association gain "access" to the future by becoming leaders on campus. By effectively communicating with the administration, faculty, staff as well as other students, SGA members learn how to deal with the everyday problems and concerns of Tech.

They also attend seminars and conferences which help them better understand leadership techniques.

Throughout the year the SGA "makes things happen" by sponsoring activities on campus, in the community and across the state. From the canned food and toy drive to the annual Ms. Tech Pageant to raising funds for the Make-A-Wish Foundation, Tech's SGA is always in action.

The 7000 Building . . .

Groundbreaking for the 7000 Building was held September 17. The groundbreaking was termed a "celebration" of the continuing educational resources offered in South Carolina. Florence-Darlington Tech is indeed fortunate to have support from county, state, and national levels to continue modernizing and upgrading its educational facilities.

Congressman Robin Tallon, who unfortunately could not be present at the ceremony, relayed a telegram that was read by Ms. Mary Demetrious. Congressman Tallon extended his congratulations and pledged his continued support of educational improvements in the 6th district.

There was an exceptional turnout of visitors, students, faculty, and staff at the event. The speakers expressed concern for the need to continue upgrading and promoting Tech's educational facilities. Senator Thomas E. Smith, Jr. hinted at plans of an additional facility on campus in the "not-too-distant" future.

The symbolic "turning of the earth" ceremony was performed by Senator Smith, Representative Denny W. Neilson, Dr. George A. Williams, chairman of the Florence-Darlington County Commission for Technical Education, and Fred C. Fore, president of Tech.

Once A Dream . . . Now A Reality

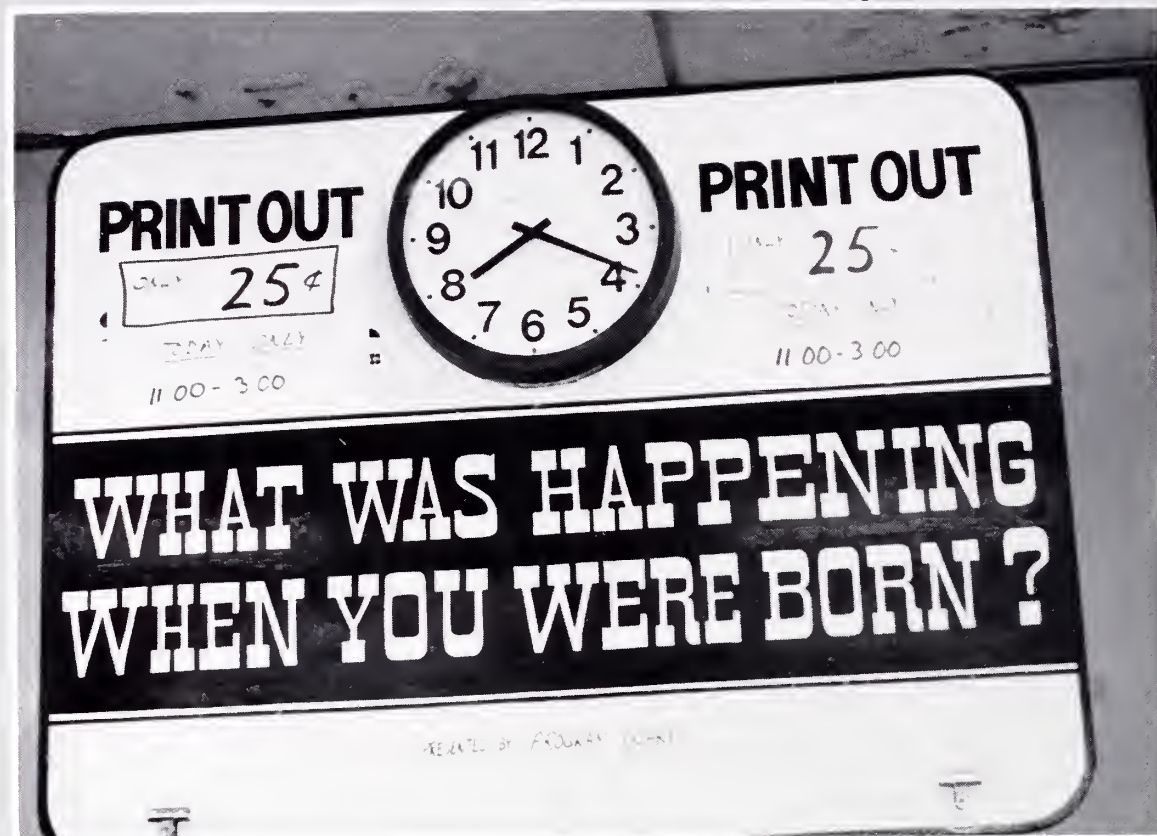

What was once a dream, has finally become a reality.

Realizing that the College was becoming somewhat overcrowded, Florence-Darlington Technical College administration set up a task force in 1975, to design a building to provide instructional space for the Engineering Technology curricula and a Learning Resources Center. Funding was secured for the building initially in 1981. Allocations for the building were received in 1984.

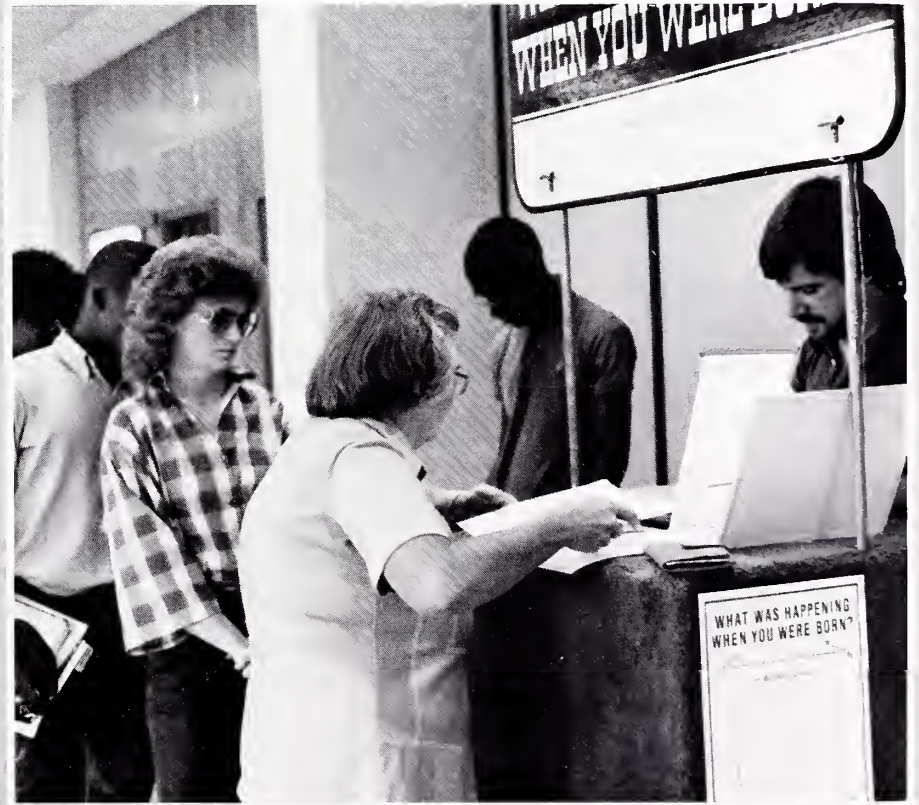

During 1984 and 1985, the architects, Reeves McCall and William S. Dowis, Jr., were employed to complete the plans for what is now the 7000 Building. These two architectural firms, working in conjunction with the College administration and faculty, have designed a facility of some 42,000 square feet which encompasses three of the Engineering Technology programs, a Computer Center, a Media Production Center, facilities for remedial education, three large lecture halls, eight classrooms, and a number of offices.

The building is being constructed over the pond, located to the right of the 600 Building, which allows the building to be a bridge from the older part of the campus to the new. College officials view the building as a bridge to the future which will assist the College to keep pace with the high technology needs of the community.

Entertainment For Everyone

Each year various artists and entertainers are brought to Florence-Darlington's campus by the student program board. In fact, the primary purpose of this board is to bring you, the students, a variety of entertainment throughout the year. It may be through the form of mime artists, comedians, musical performers or even caricature artists. However, there's one thing for sure ... it's all fun! So, for the best in entertainment, keep your eyes open for posters inviting you to an hour of enjoyment — sponsored by your student program board.

'Tis The Season

Each year as Thanksgiving comes and goes, practically everyone eagerly begins making Christmas plans. It seems there's so much to do . . . shop, bake, plan parties and of course, decorate! Yes, Christmas is a special time of the year.

This year the Student Government Association made sure that all Tech students and employees had the opportunity to get into the Christmas spirit. To really kick things off in style, the SGA sponsored its annual Christmas party at Bogie's in Florence. In addition, the SGA sponsored a door decorating contest. Everywhere you looked, the Christmas spirit was evident. The competition was tough. However, in the end, Fred Culler's door, decorated by the fashion department was declared the winner.

To Be Jolly . . .

Helping others through giving and sharing is also an important part of Christmas. Through tireless efforts of SGA workers, the canned food and toy drive was the most successful ever!

Children. They're so special and they're always an important part of the Christmas season. The Children's Christmas party this past year was a blast! Dave Neilson, a local magician was on hand to amaze the children with his bag of tricks. And of course there were games, Christmas Carols and food. Santa Claus even made a surprise visit near the end of the night.

Christmas just wouldn't be complete without music. "Silent Night," "Jingle Bells," "Here Comes Santa Claus" . . . they're all a part of the Christmas tradition. Throughout December the Program Board invited high school and elementary choirs to perform on campus. Through song and sometimes inspirational message, these students helped bring the Christmas spirit to Tech.

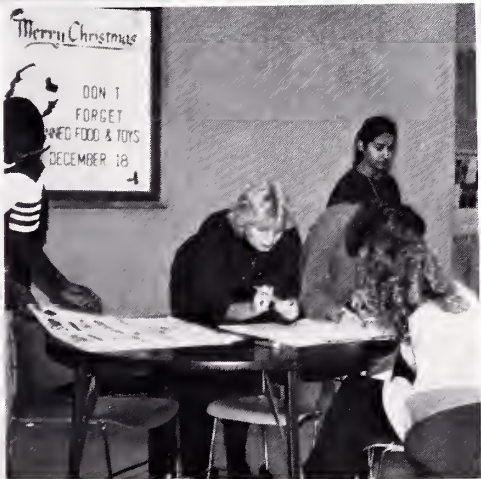

Christmas . . . The Most Wonderful Time Of The Year

DECK THE HALLS WITH TEETH
BY GOLLY

'Tis the season to be jolly! Christmas. It's that one time of the year most of us look forward to. Families join together, homes are brilliantly decorated and children eagerly await the arrival of St. Nick.

Parties. They're the first thing many of us think of when the Christmas season rolls around. Bogie's was the place . . . December 8 the time . . . and it was sponsored by the SGA.

Children. They're always a part of the Christmas season. The SGA also sponsored a Children's Christmas party on December 9. Games, crafts, food, music and of course, Santa Claus, were all a part of this special party.

Decorations. The door decorating contest, which was also sponsored by the SGA, was a great success. Doors were decorated with Christmas trees, St. Nicks, and angels. The winning door featured a gingerbread house made of gumdrops, graham crackers and other candies.

Caroling. Christmas carols, are traditional everywhere. This past Christmas the Programming Board invited choral groups from area schools.

Helping Others. Each year the SGA holds a canned food and toy drive throughout the month of December. With the assistance of dedicated SGA members, eight families were able to feel the spirit of Christmas.

Ronnie Rogers was the overall talent show winner. He actually wrote his prize-winning song, "We're Not Alone."

Beth Touchberry's careful planning really paid off! Here she is shown greeting the audience.

With his rendition of "Stand," Michael Myers became an obvious favorite of the girls.

SGA president, Kathleen Tisdale, sang "Wise Up" by Amy Grant.

For someone so small, Penny Davis amazed the audience with her "big" voice singing Precious Lord.

Tech Students . . . Truly Talented

Angela Atkinson stunned the audience with her musical number, "Out Here On My Own," by Irene Cara.

After the talent show, Ronnie Rogers, Penny Davis and Ronnie Brunson complimented each other.

Shown from left to right — Angela Atkinson, third place winner, Louise James, second place winner and Ronnie Rogers, overall winner.

Talent. There's one thing for sure. Florence-Darlington Technical College has it! December 5, the Programming Board co-sponsored a talent show with Francis Marion College. Those attending were thoroughly entertained and judging was no easy task. However, in the end Tech came away with top honors. Ronnie Rogers from Mullins won first place, Louise James of Florence was awarded second place and Angela Atkinson from Hartsville won third place.

Competition In Tournaments . . . KEEN!!

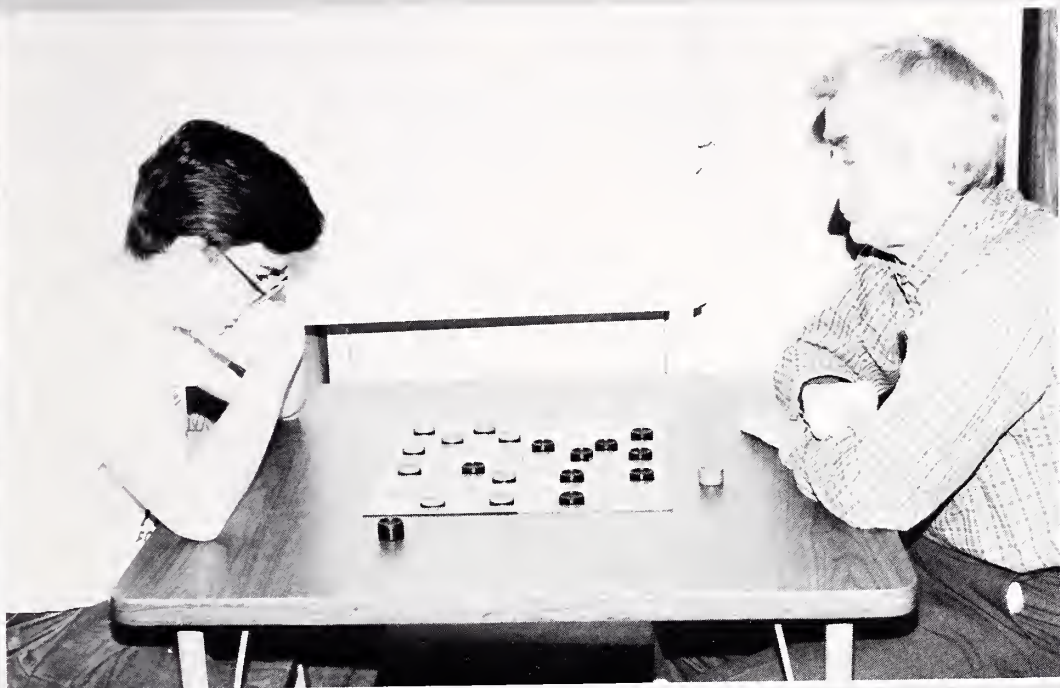

Each year the Programming Board sponsors a variety of tournaments for Tech students. Throughout the past year, skilled competitors used their expertise to win trophies and cash prizes.

Out of all of the tournaments held, there was one that created excitement and suspense for almost a month . . . pool. Day in and day out, it's been the favorite past-time for many Tech students, and when tournament time came, it was a favorite.

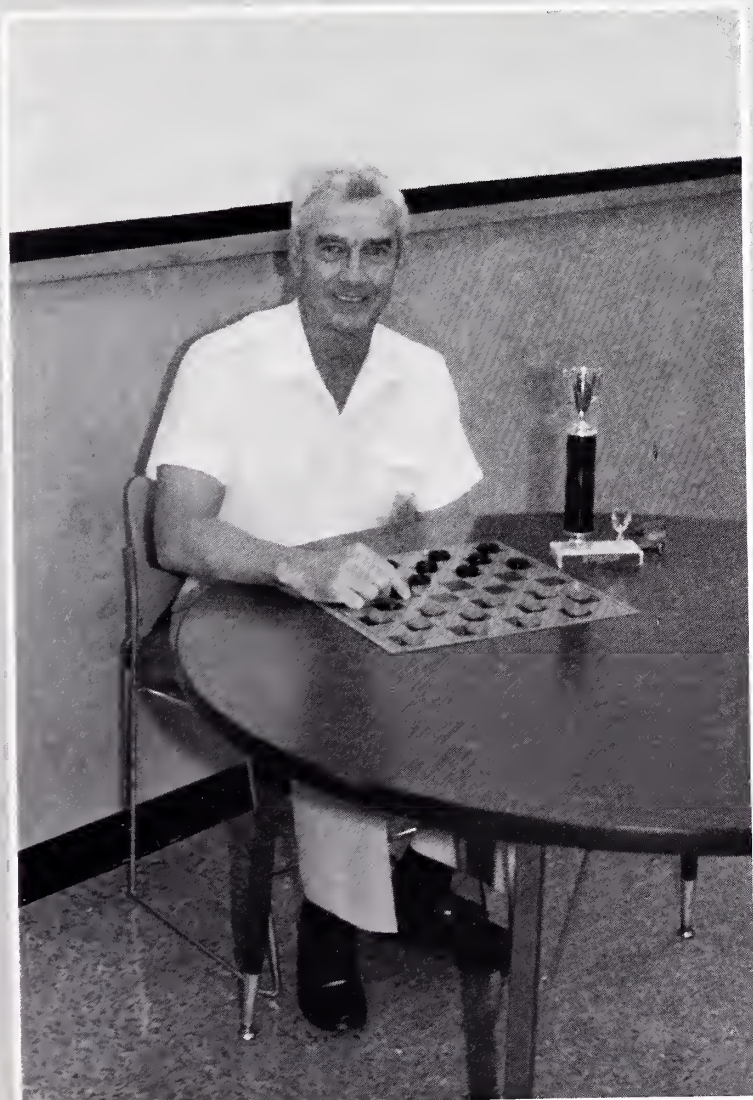

Timothy Hough proudly displays his trophy after winning the spades tournament.

Concentration is a "must" when playing chess. Tony Carmichael possessed true skill and concentration during the tournament and ended up as the chess champ.

Paul Kellar and E.H. Thomas made it to the finals in the checkers tournament.

Ronnie Brunson won the coveted pool tournament. He was presented his check by Programming Board member, Penny Davis.

After making it to the championship round, E.H. Thomas was determined to become the new checkers champ.

Swing Your Partner!

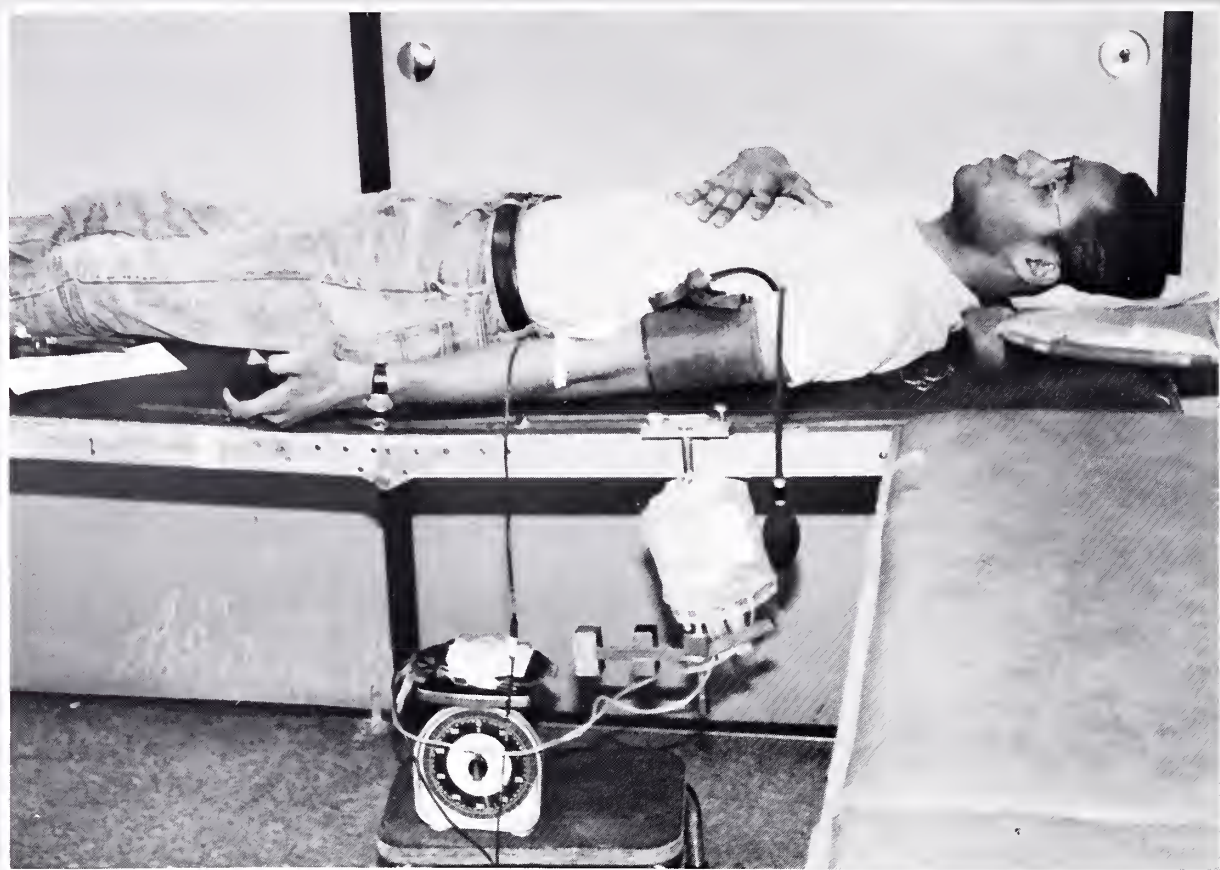

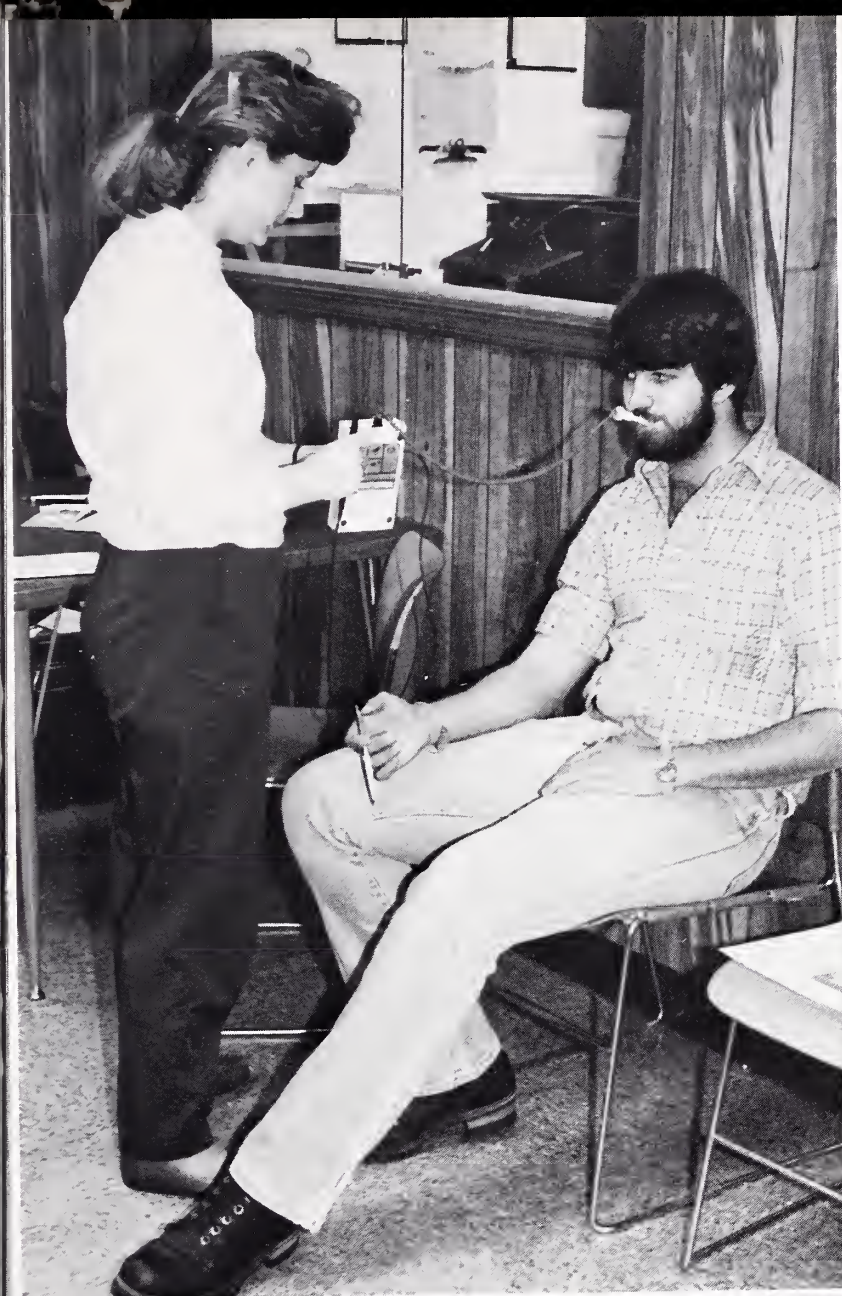

Swing your partner! Do-si-do! Square dancing. It's as traditional as mom's apple pie and on January 22, the SGA sponsored a Country Hoe-Down. Instead of "jamming," there was "swinging" ... and plenty of it. With the assistance of the Prom-O-Nabors, a square dance group, Tech students and employees were able to actually experience one of America's oldest folk dances. They might have been a little hesitant at first, but in the end, those who got involved had loads of fun!

In addition to the square dancing, there was also entertainment provided by Tech students Joyce Bradshaw and Thelma McInnis.

Blood . . . It's Just What The Doctor Ordered

Of all the gifts that can be given, the most precious is blood. It's the gift of life and every 17 seconds someone in the United States needs it.

With the support of volunteer donars, the Red Cross is able to meet the needs of emergency situations everywhere. However, it's through the assistance of blood drive sponsors that they are able to meet these needs.

Tech's Student Government Association assists the Red Cross every quarter by sponsoring a blood drive. Students, employees and the community are given the opportunity to volunteer. It's love from the heart!

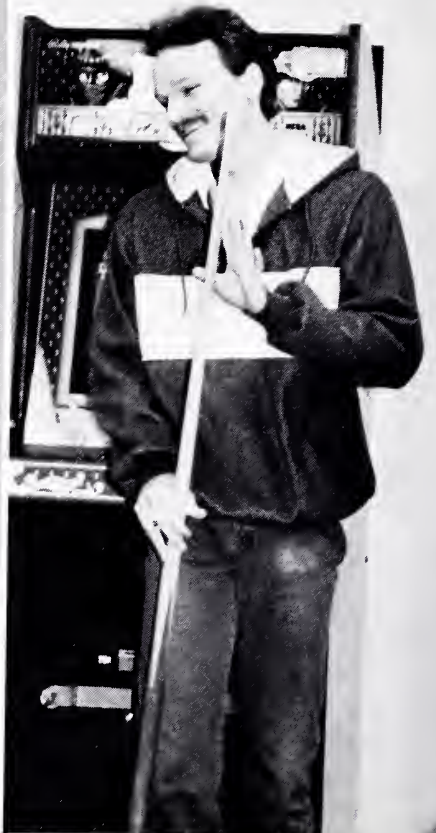

In Observance Of Black Awareness

Student involvement was evident during the third annual Black Awareness Program. Helen Beline began the program with a tribute to Martin Luther King. The Tech singers, consisting of Joey Singletary, Carol Person, Lynn Person and Louise James provided stunning entertainment. Singing solo numbers were Penny Davis and Louise James. Fred Jolly, Human Services Director for the Community Action Agency, moved the audience with an inspirational speech.

Leisure Time

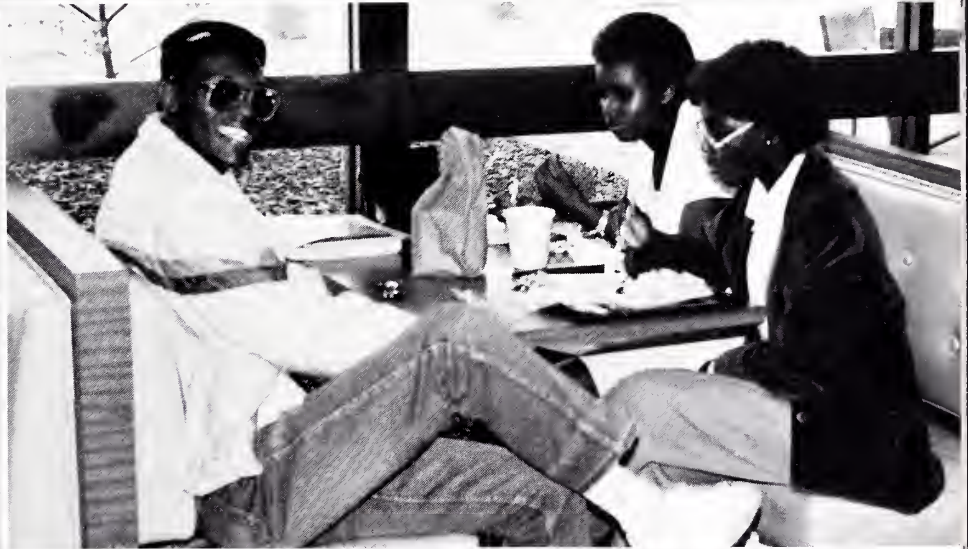

Tech's Cafeteria
There's Always
A Crowd!

Man, I'm Hungry!

The first place many Tech students head for in the morning is the cafeteria. To be sure, they're after that first cup of coffee and maybe even a homemade dough-nut or sausage biscuit. And at lunch there are times when there is not even a vacant seat! Many students also find the cafeteria a relaxing place to study and some even find it's the best place on campus to catch up on the latest.

College . . . There's More To It Than Studying!

CAROL SHERRON

*Ms. Florence-Darlington
Technical College
1987*

“Carolina Girls”

And the winners are Marsha Johnson, first runner-up, Carol Sherron, Ms. Tech, and Leslie Jones, second runner-up.

Carolina Girls. They're all very special. On Friday, February 27, nineteen of Tech's loveliest girls competed for the title of Ms. Tech. The pageant, which was sponsored by the Student Government Association, was one of the most successful ever. As mistress of ceremonies, Dawn Smith, Miss South Carolina, captivated the audience with her charm. In addition, Wendy Williams and Shellie Blake from Southeastern Community College entertained throughout the night.

The judges certainly had a difficult task because all of the girls were beautiful. However, when it was all over, Carol Sherron, a paralegal student from Florence, was named Ms. Tech 1987. Congratulations, Carol!

Toni Hooks, Ms. Tech 1986 and Dawn Smith, Miss South Carolina strike a pose for the campus photographer.

After changing into her evening gown, Peggy McCutchen nervously awaits the final phase of competition.

The nineteen lovely contestants "show their stuff" during the opening number.

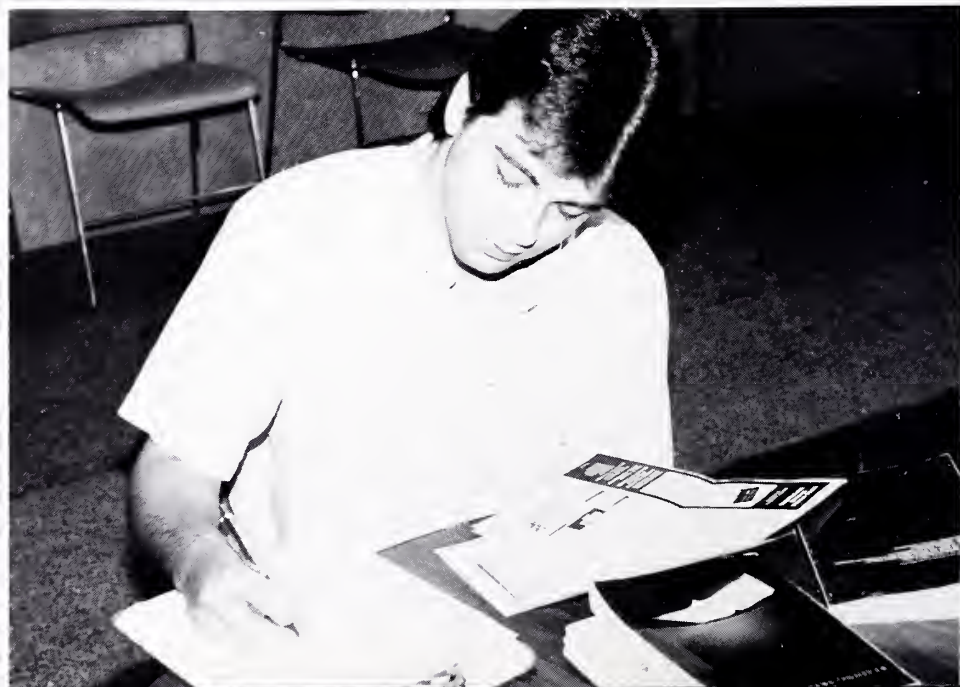

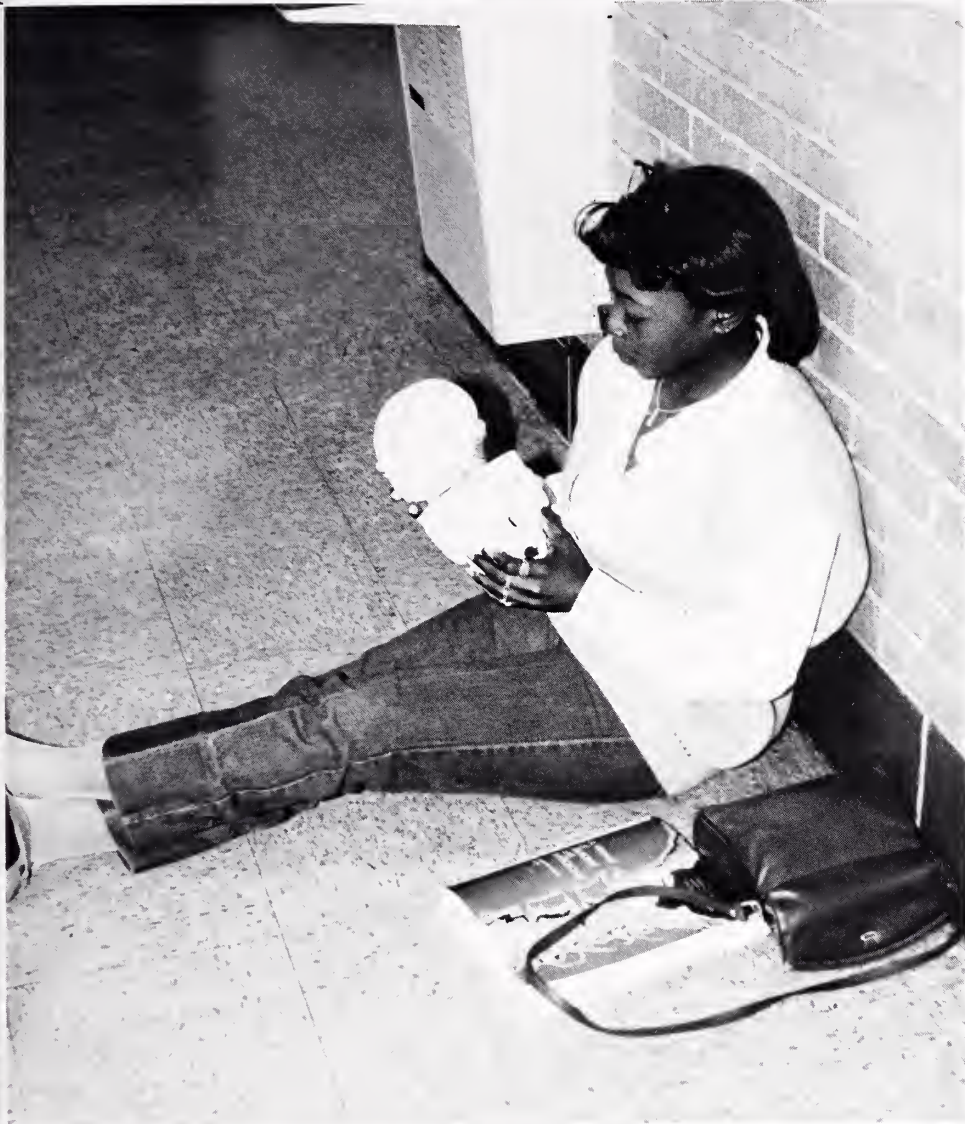

Jennifer Conyers, Lisa Howle and Jean Alexander are anxiously awaiting the opening number as they add finishing touches to their hair and make-up.

A reception with the judges was held for the girls the afternoon of the pageant.

Studying, Studying And More Studying!

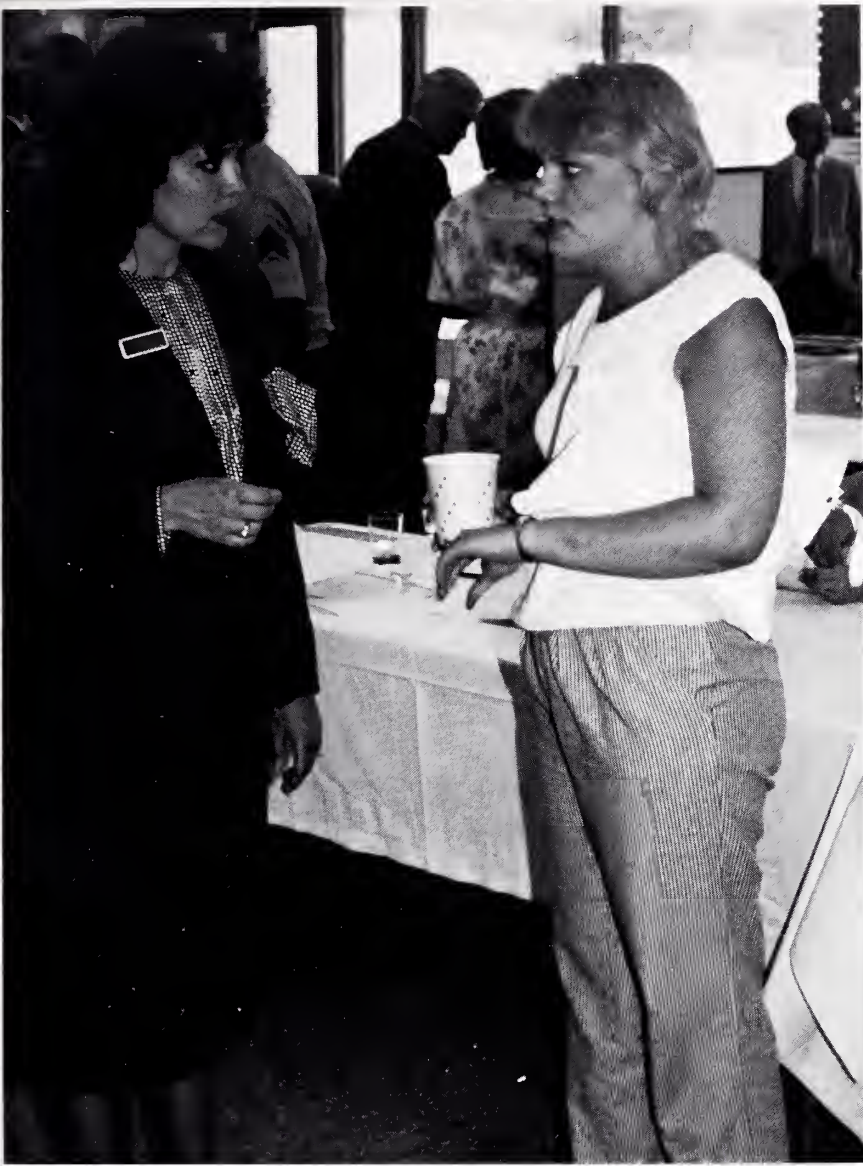

It seems as if everywhere one looks on the Tech campus someone is curled up on a bench, in a corner or even on the floor in a hallway studying. Studying. To many students it's a necessary evil, but to most, it's a key to success. And whether they're studying for a test, an afternoon lab or just catching up on material they missed, they all realize the importance of good study habits.

Employer Visitation Day

On Thursday, April 23, the Placement Office hosted its third annual Employer Visitation Day.

The purpose of Employer Visitation Day was to inform students of the various types of career opportunities available to them. In addition, businesses and industries were able to conduct on-campus interviews with students. Employer Visitation Day also gave students an opportunity to talk to other area colleges about transferring to a four-year college.

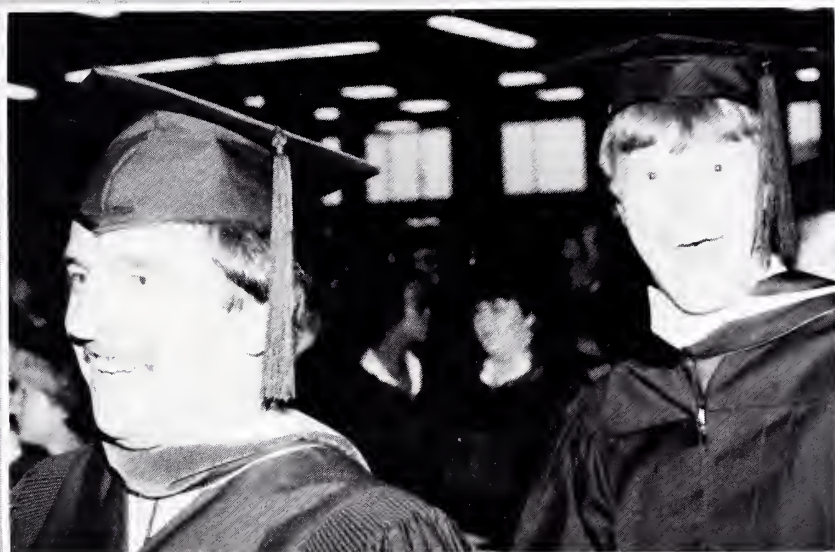

Faculty and staff members also benefitted from Employer Visitation Day. They were given an opportunity to find out the specific skills students need in order to succeed in their chosen occupations.

Graduation . . .
For Some,
It's The Most
Important Day Of
The Year

At Tech's commencement ceremonies held May 29 at West Florence High School, 440 students earned degrees. Dr. Lewie C. Roache, dean of the school of arts and sciences and professor of biology of South Carolina State College, delivered the commencement address.

Also, during the ceremony, Carol Broyhill, alumni president, welcomed the new graduates to the alumni association.

A mother and daughter were among two of the graduates. Eileen Young majored in human services, while her daughter, Darlene, majored in marketing. Having the opportunity to graduate together was a "wonderful experience" for the daughter and mother team.

Think Before

An \$86,853 Highway Safety Program has been started in the South Carolina Technical Colleges. The federal grant, which is being financed by the Governor's Office of Highway Safety, Division of Highway Safety. Aiken Technical College will coordinate the project.

Project Think is designed to Promote automobile safety precautions, such as routine use of safety belts and child safety seats. Discouraging the use of alcohol and drugs while driving is another important part of the program.

At peak times, there is an estimated 17,000-20,000 technical college students commuting in the State of South Carolina, which puts this group at a high risk for injury or death.

In 1985, there were over 11,000 traffic accidents in South Carolina, resulting in 949 deaths and 32,388 injuries. Forty-one percent (41%) of the deaths were alcohol/drug related. More than 90% of the victims were not wearing safety belts.

With these figures in mind, Florence-Darlington Technical College has begun its promotion of the Highway Safety Program, which has been named "Project Think." Recently, a survey was conducted on campus to determine seat belt use of Florence-Darlington Tech students and employees. Out of 100 drivers surveyed, only 20 were wearing safety belts.

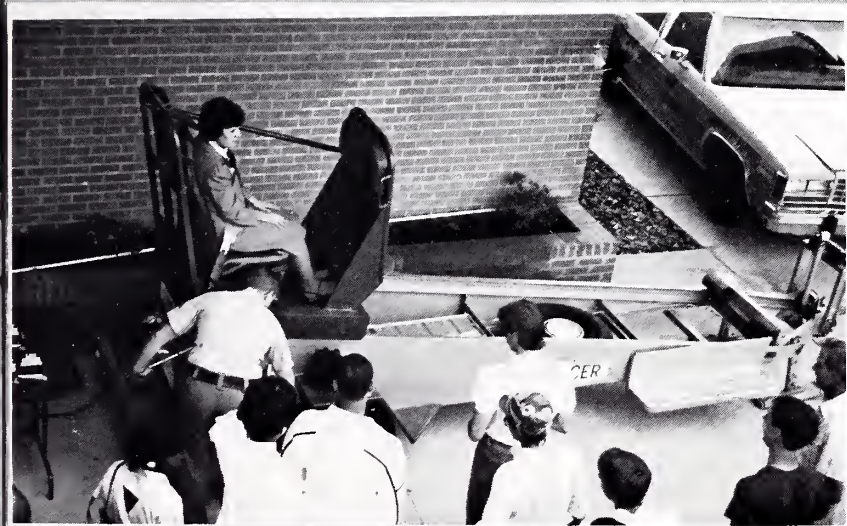

Promotions and projects are being carried out on the Tech Campus until mid-October. During Spring Fling, May 14, "The Convincer", "Deputy Mac", and RU-SAF-TOO were on campus.

In addition, the Criminal Justice Department held a simulated alcohol intoxication experiment in the parking lot. The project consisted of two selected students and two disc jockeys, who drank beer from 9:30 am-1 pm. Participants were checked hourly on the breathalyzer and with sobriety tests. The message: DO NOT DRINK AND DRIVE.

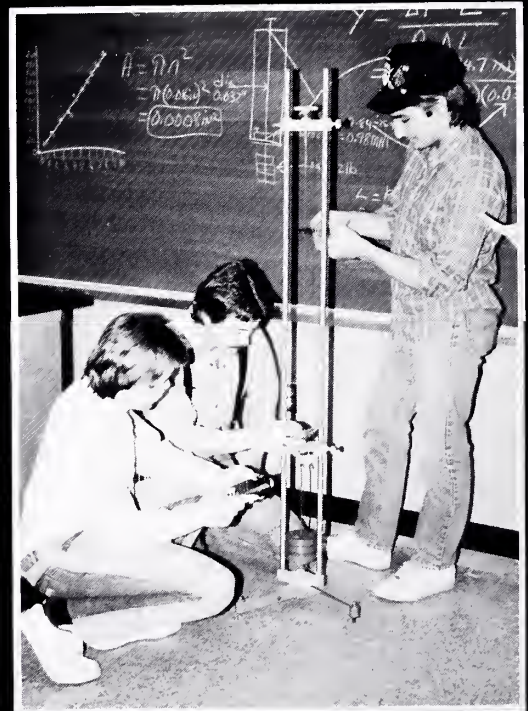

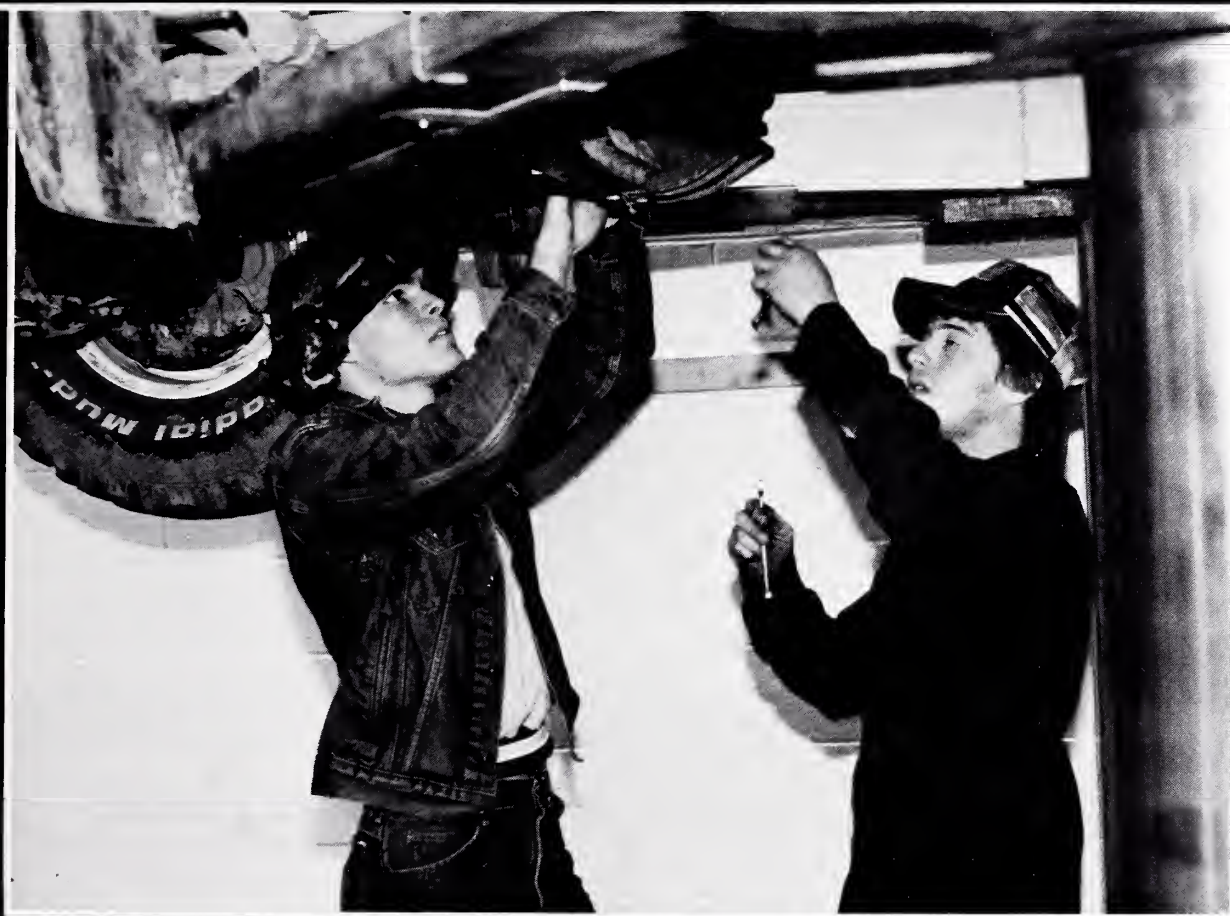

You Drive . . .

AGRIBUSINESS

Business and General Studies

The division of Business and General Studies offers career opportunities in a variety of areas from agronomy to fashion merchandising to criminal justice — just to name a few. Changing market demands and new technological innovations create challenges in this division. However, through the constant monitoring of new trends in the business environment, these are challenges which continue to be met.

Aircraft Maintenance Technology

The age of computers is upon us! Computers are fast becoming a major part of today's business world. Students studying for degrees in areas such as computer technology, secretarial science and even health care secretary spend many hours learning the importance of communications through computers. Much of the success of American industry is based on high qualified engineers. Through a variety of classroom and laboratory settings, students enrolled in programs such as engineering graphics technology, civil engineering technology and electronic engineering technology. Working with our hands ... It's how America got its start. Even in an age of computerization, industrial related careers will always be needed. Welding, machine tool technology as well as heating ventilation and air conditioning give students the opportunity to learn through working with their hands.

*Health
Studies*

In today's society there is a constant need for highly qualified medical personnel in our hospitals, dentist offices and doctors offices. For those students interested in the health field Tech offers a variety of degree and diploma programs. Through the division of health studies, students work toward degrees in specialized areas from nursing to dental hygiene to surgical technology. Student training includes classroom study, campus laboratory sessions, and experience in applying skills learned in hospitals under the supervision of qualified instructors.

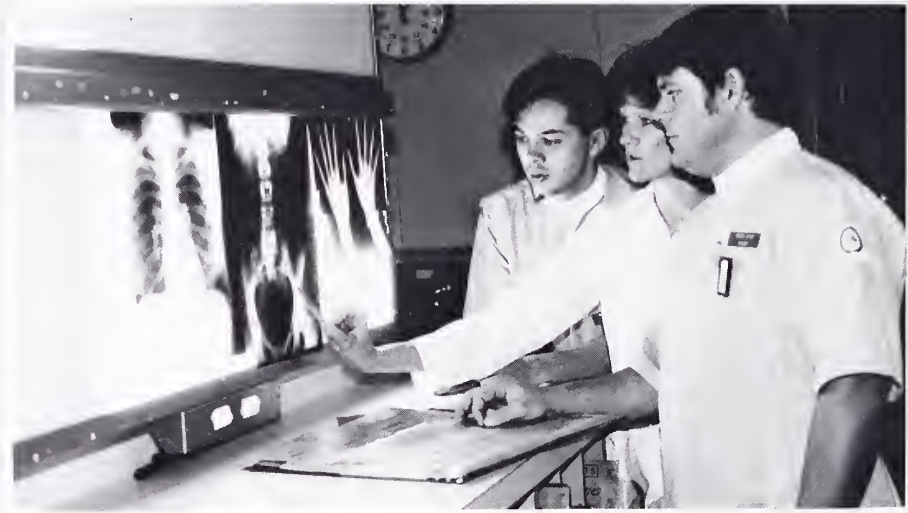

Helping others stay healthy It's what the medical field is all about!

“Where
Careers
Begin”

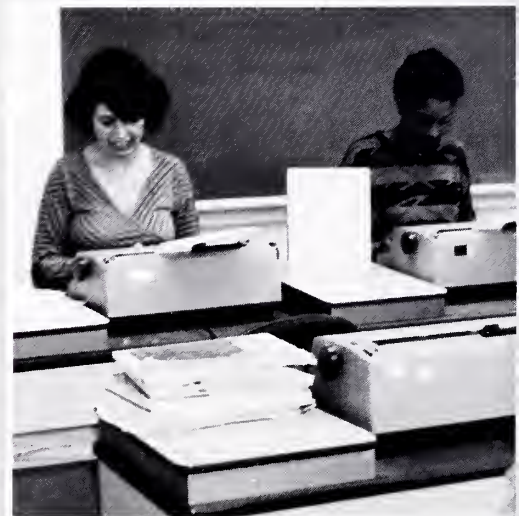

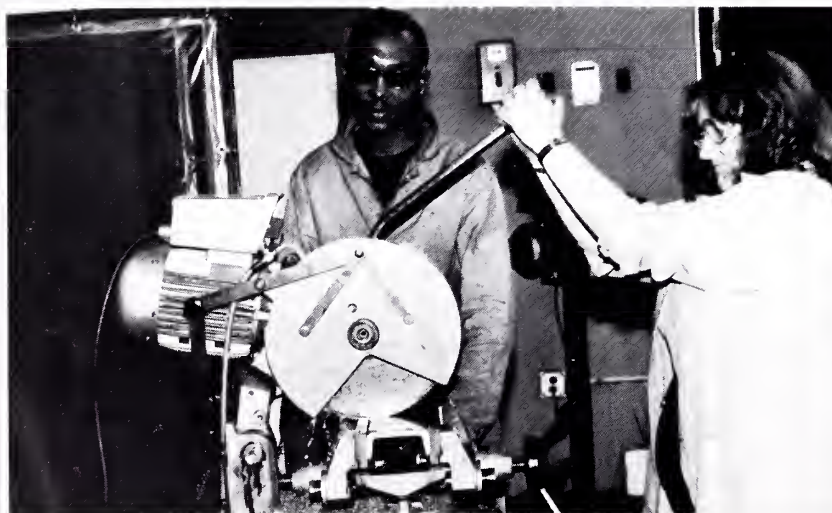

Educational Support Services

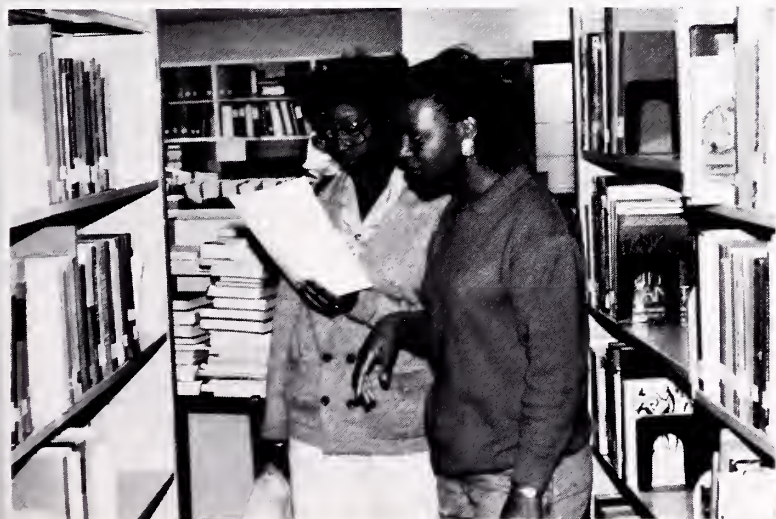

The Division of Educational Support Services provides services to Tech in a variety of ways. These areas include pre-curricular training, library services, educational development, cooperative education, and supplemental training in basic academic skills.

IMPACT

Job Training Partnership Act (JTPA)

Library

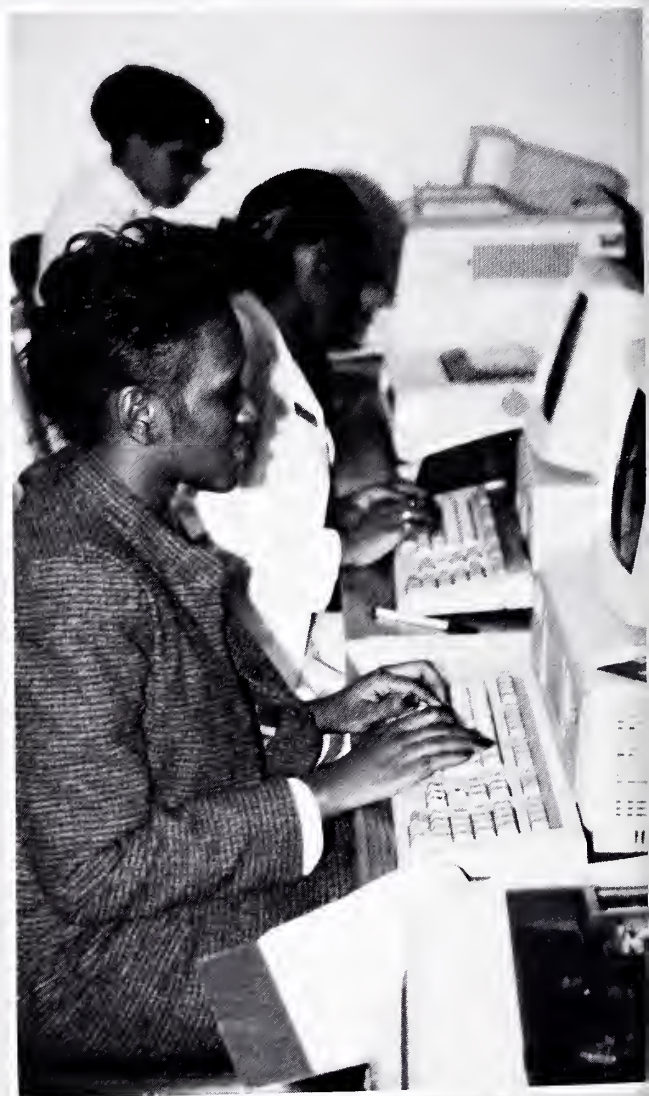

Special Services

Continuing Education

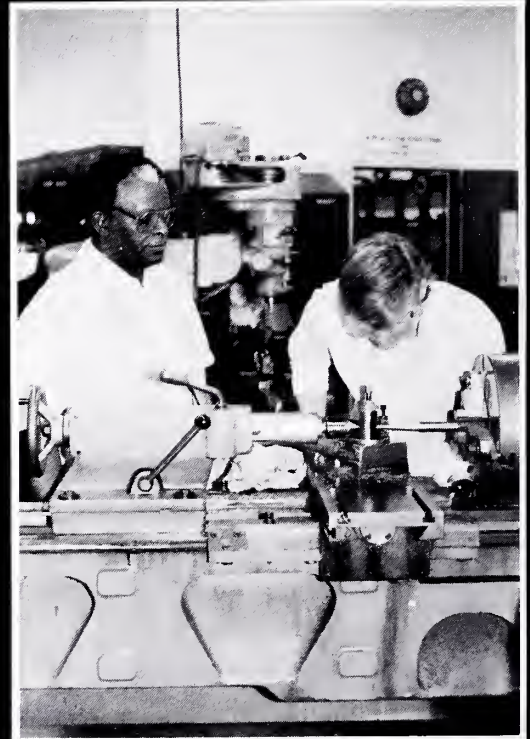

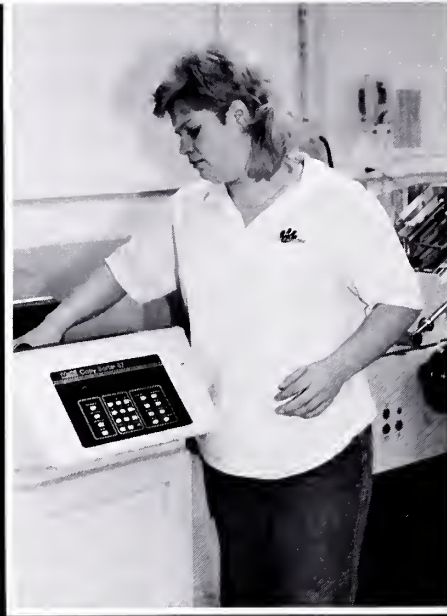

Through the Continuing Education Division persons may upgrade their occupational skills, enhance their advancement possibilities, increase their earnings or even acquire new skills. In fact that is what this division is all about ... upgrading, retraining and training.

Courses offered are selected on the basis of periodic surveys of the business, industrial and agricultural communities. Whether it's learning how to administer CPR, how to start a small business or even how to work on outboard motors, the continuing education division can teach it.

THE GOAL OF EVERY DEAN

EDUCATION

Being the dean of a division sounds impressive and probably is. However, what most people don't realize is that all successful deans spend hours upon hours solving the problems and discussing the concerns of the college. Each dean has a division that he or she is responsible for and within each of these divisions are many employees. And where there are people, there are bound to be headaches. Hats off to the deans at Florence-Darlington Tech.

Penny Bladon, Dean of Business and General Studies, discusses the winter quarter schedule with Angela Fulcher, division secretary.

BURNING THE MIDNIGHT OIL

STUDY STUDY STUDY

STUDY . TESTS . GRADES. They're the most dreaded words in a college student's vocabulary. By mid-quarter you actually have to open the textbook that you purchased from the college bookstore. Sometimes you even have to grace the doors of the library to do research . . . that is, if you can remember which building it's in. And then it seems like exams are coming up next week. Don't worry. All you have to do is cram. And if you're lucky, I mean real lucky, you might even make an A.

Educational And
Support Services
Prepare

The majority of the classes taught through the division of educational and support services are designed to provide students with a better background in English, reading and math before taking curricular courses requiring these skills. Many of these courses are taught in lab situations, however, tutoring is available. Counseling is also an important part of all departments within this division.

Keeping Up With

“High Tech”

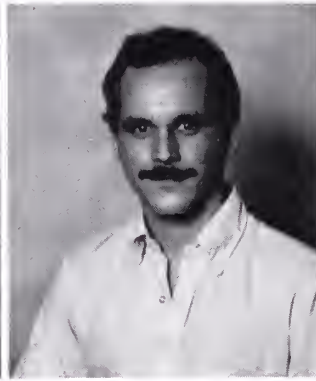

In all of the Technological Studies Programs advanced technology training is offered. Associate degrees and diplomas are available in engineering technology, industrial technology and information technology. The “hand-on” learning approach is used in all three areas.

James Mack, Machine Tool Technology instructor, helps one of his students during lab.

Jimmy Howell
Instructor, Automotive Technology

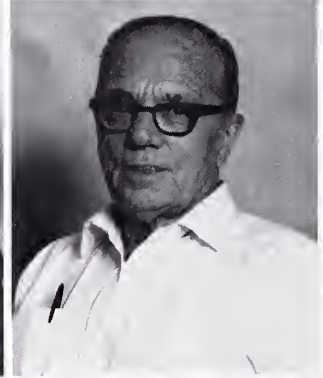

Tony Howell
Lab Assistant, Electronics Engineering
Technology

Sebastian Hui
Instructor, Electronics Engineering
Technology

Ed Jackson, Jr.
Instructor, Heating, Ventilation, and
Air Conditioning Technology

Mary Frances Jones
Instructor, Secretarial Science

Richard Joyner
Instructor, Automotive Technology

Doug Macdonald
Instructor, Civil Engineering
Technology

James Mack
Instructor, Machine Tool Technology

More people today are studying computers and their many uses than ever before, especially since businesses have discovered their many advantages. Shown here is Mary Frances Jones and a word processing student. Mrs. Jones' instruction is vital in preparing first-class secretaries for our community.

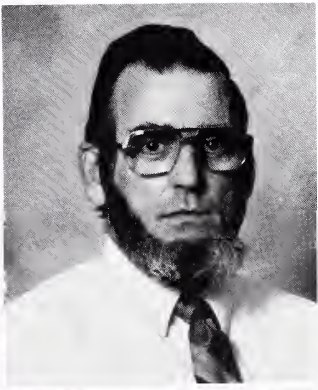

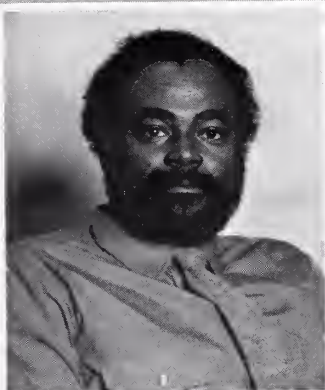

AT WORK AND PLAY

Al Belge and Robert Smith are two familiar faces seen around Tech's campus after dark. Here, they are enjoying a few quiet minutes in one of Tech's patio areas.

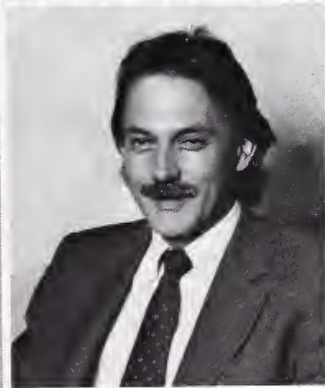

Henry Powers, welding instructor, spent many hours during the summer working on the spillway. The spillway will keep Tech's spring fed pond at a constant 16'½".

Danny Miles
Instructor, Automotive Technology

Jonnie Miller
Instructor, Computer Technology

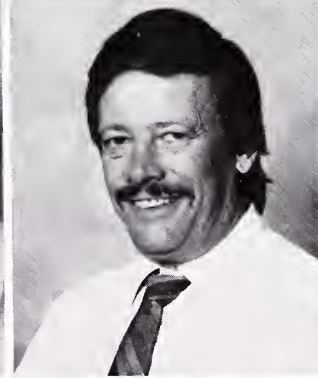

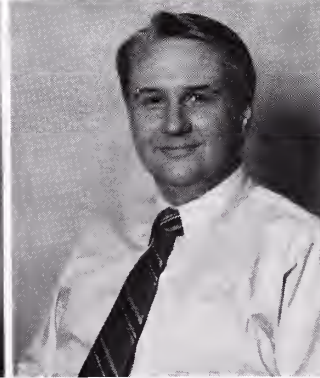

Leroy Richardson
Instructor, Industrial Mechanics

Cecil Ridgill
Coordinator, Electronics Engineering
Technology, Engineering Graphics, and Civil
Engineering

Frank Rugh
Coordinator, Automotive Technology and
Aircraft Maintenance Technology

Frances Sims
Instructor, Secretarial Science

Donald Sorenson
Coordinator, Industrial
Electricity/Electronics, Industrial Mechanics,
and Heating, Ventilation and Air
Conditioning Technology

Jim Spencer
Instructor, Heating, Ventilation and Air
Conditioning Technology

Alan Yendall
Coordinator, Machine Tool Technology, and
Welding

Dub Cameron
Dean, Continuing Education

Jackie Amerson
Financial Clerk, Continuing Education

Catherine Beni
Secretary, Continuing Education

Catherine Deas
Allied Health Coordinator, Continuing Education

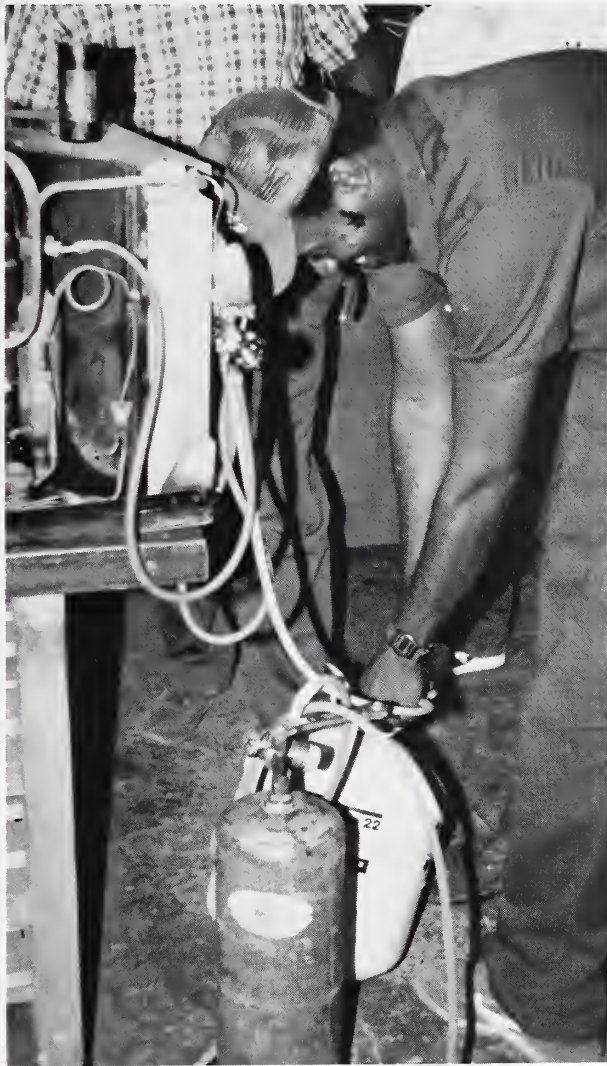

Linda Floyd
Campus Coordinator, Continuing Education

The Continuing Education Division teaches several courses that are dominated by the male population. This electronics course is just one example.

Special interest courses, such as flower arranging, are also available through continuing education. Flower arranging continues to be one of the more popular courses taught at night.

Through courses such as Refrigeration I, students can learn and update job skills.

A dog? Yes, you can even learn how to professionally clip dogs. And all you have to supply are the dogs.

Jo Ann Griffin
Secretary, Continuing Education

Amelia Harrelson
Secretary, Continuing Education

Linda Paul
Secretary, Continuing Education

Johnna Shirley
Assistant Dean, Continuing Education

Wayne Sims
Industrial Coordinator, Continuing Education

Dianne Watford
Secretary, Continuing Education

ALUMNI ASSOCIATION ENJOYS BUSY YEAR

In appreciation for her support and dedication throughout the year, outgoing alumni president, Ron Skipper presented Debbie Williamson with a plaque at the annual meeting.

At the annual meeting held in November, the 1987 alumni officers and trustees took their oaths. Standing from left to right are Ron Skipper, 1986 president; Daphne Bazen, Everett Howard, Carol Broyhill, Allen Grantham, Missy Coker, and Mary Lee Stuckey.

The Alumni Association hosted a reception for the 1986 Tech graduates after graduation rehearsal.

Mickey Foster, Vice-President for Development, catches the photographer sneaking a picture during the first annual phonathon.

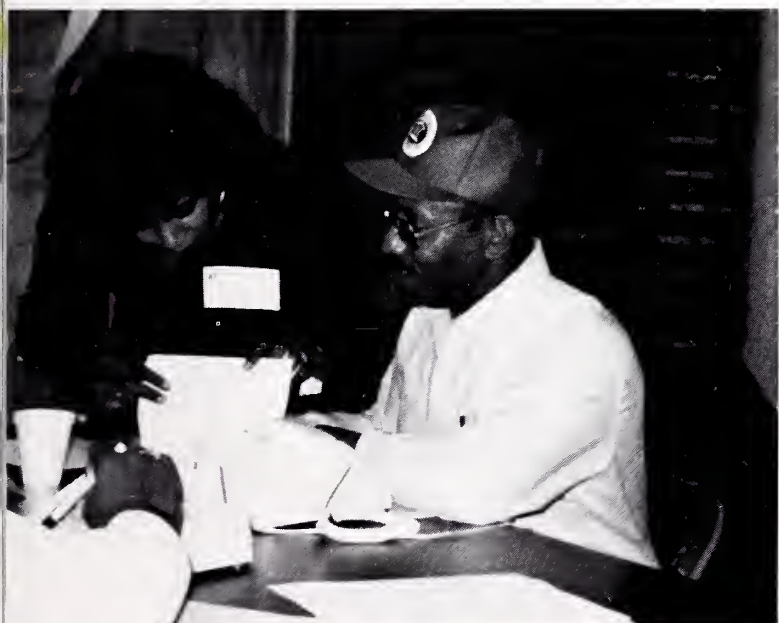

There's an old adage that says "hard work pays off." Over the past year this saying has become a reality for Tech's Alumni Association.

Ron Skipper, Alumni president, was determined to see graduates become more actively involved in the Association and in Tech. At the end of the year the Alumni Association had come a long way.

Beginning in May with a reception for the 1986 graduates, the Alumni Association began a full year of activities. In addition, the graduates received certificates of membership into the Association.

Alumni on-campus committees were also formed. Alumni members were given the opportunity to speak in classes and give their expertise to students.

In addition, many hours were spent revising the constitution and by laws. And at the annual alumni meeting, the Association presented Tech with a check for \$2,000 for student scholarships. The money was from the first annual phonathon. During the phonathon, \$7,000 was pledged. Also, at the annual meeting Carol Broyhill was elected the 1987 Alumni Association president.

Sylvia Elliott assists Thornell Williams, a 1973 graduate from the Engineering Graphics program, with a list of names during the phonathon.

Everett Howard explains the purpose of the phonathon to one of Tech's many graduates.

Outstanding Employees

At its annual faculty-staff banquet held in October, Florence-Darlington Technical College named the outstanding employees of the year. Standing from left to right are Patricia M. Long, recipient of the President's Management Excellence Award; Dr. Holly M. Westcott, faculty member of the year; and Ronald P. Flowers, staff member of the year.

Patty M. Long of Darlington serves as the coordinator of audio visual services at Tech. The President's Management Excellence Award is based on outstanding contributions to the administrative operation of the College and high standards of professionalism.

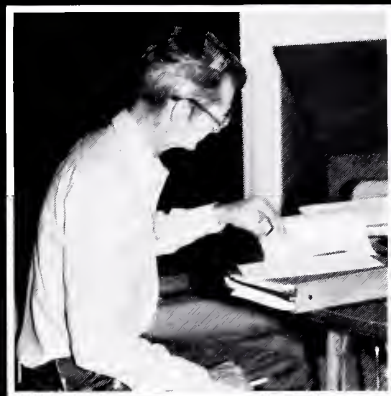

Dr. Holly M. Westcott is a member of the English department at Tech. The outstanding faculty member of the year award is based on consistent adherence to excellence in teaching principles.

Ron P. Flowers serves as Tech's maintenance supervisor. The staff member of the year award is based on efficient, effective and inspirational performance of duties.

SGA State Leadership Workshop

The Spring Student Government Association leadership workshop was a success. Eight members of Florence-Darlington's SGA attended the conference, which was held in Myrtle Beach, May 3-5. The students attended leadership seminars during the day, but at night they were all ready to have fun. The first night the clock was turned back to 1957 as Aiken Tech sponsored a "fifties" dance.

At the conclusion of the conference Florence-Darlington won the most outstanding scrapbook award for the third year in a row. In addition, the "Tech Times" newspaper also won the most outstanding newspaper award.

Anna Jakab, (left) attends workshop on "The Psychology of Winning."

THE GANG! Seated: Carol Sherron and Nancy Lee Standing: Kathleen Tisdale, Penny Davis, Cheryl Mathews, Marsha Johnson, Anna Jakab and Cindy Sims ... They know they're special!

Cheryl Mathews really gets down at the "fifties" dance.

The "crowd" from Florence Darlington kept the dance floor hot!

Programming Board Works Hard

Throughout the year the programming board stayed extremely busy providing activities for everyone. In fact, that's their goal!

Success of the many activities sponsored by the programming board. Whether it's mime, magic or music, the entertainment brought to Tech was great!

In addition, the programming board also sponsored the annual Halloween Happening, a talent show as well as a Black History awareness program.

Keeping everyone informed of activities is a must. Penny Davis regularly checks the bulletin boards.

Program board member Lanette Lee and a friend help decorate for Halloween Happening.

Everyone can always depend on Herman Slater to be on hand to help set up for activities.

While decorating for Halloween Happening, Beth Touchberry, chairperson, and Susan Winchester, Student Activities Coordinator discuss where to hang a bat.

“Tech Times” Has Successful Year

Find out what's going on at Tech by reading the monthly campus newspaper, the "Tech Times." Better yet, get involved by becoming a member of the staff!

We're really proud of the staff's accomplishments this year. At the Spring State Tech SGA Leadership Workshop, the "Tech Times" won the most outstanding newspaper award.

Kathleen Tisdale and Cindy Sims discuss the layout of the paper.

Access...

Fun and excitement! That's what one can expect from participation in the many campus activities here at Tech. And each year, the fun and excitement grows. This past year has been a prime example ... just flip back through the pages again and see.

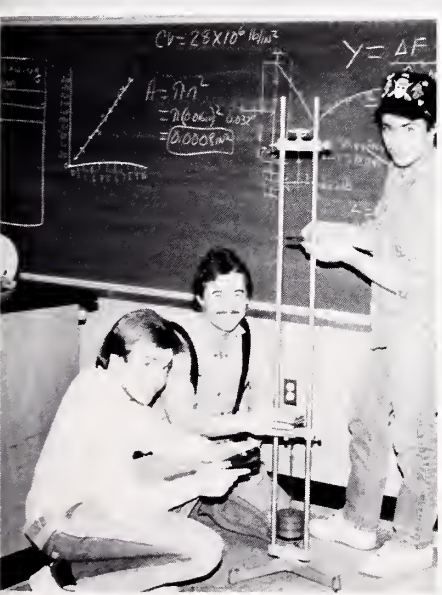

In addition, becoming involved in the organization of campus activities can be an important "access to the future." Those who have actively been involved in the past year have gained effective leadership skills, increased their communication abilities, and learned how to set achievable goals. Last but not least ... they've made new and memorable friendships. Friendships that will last a lifetime!

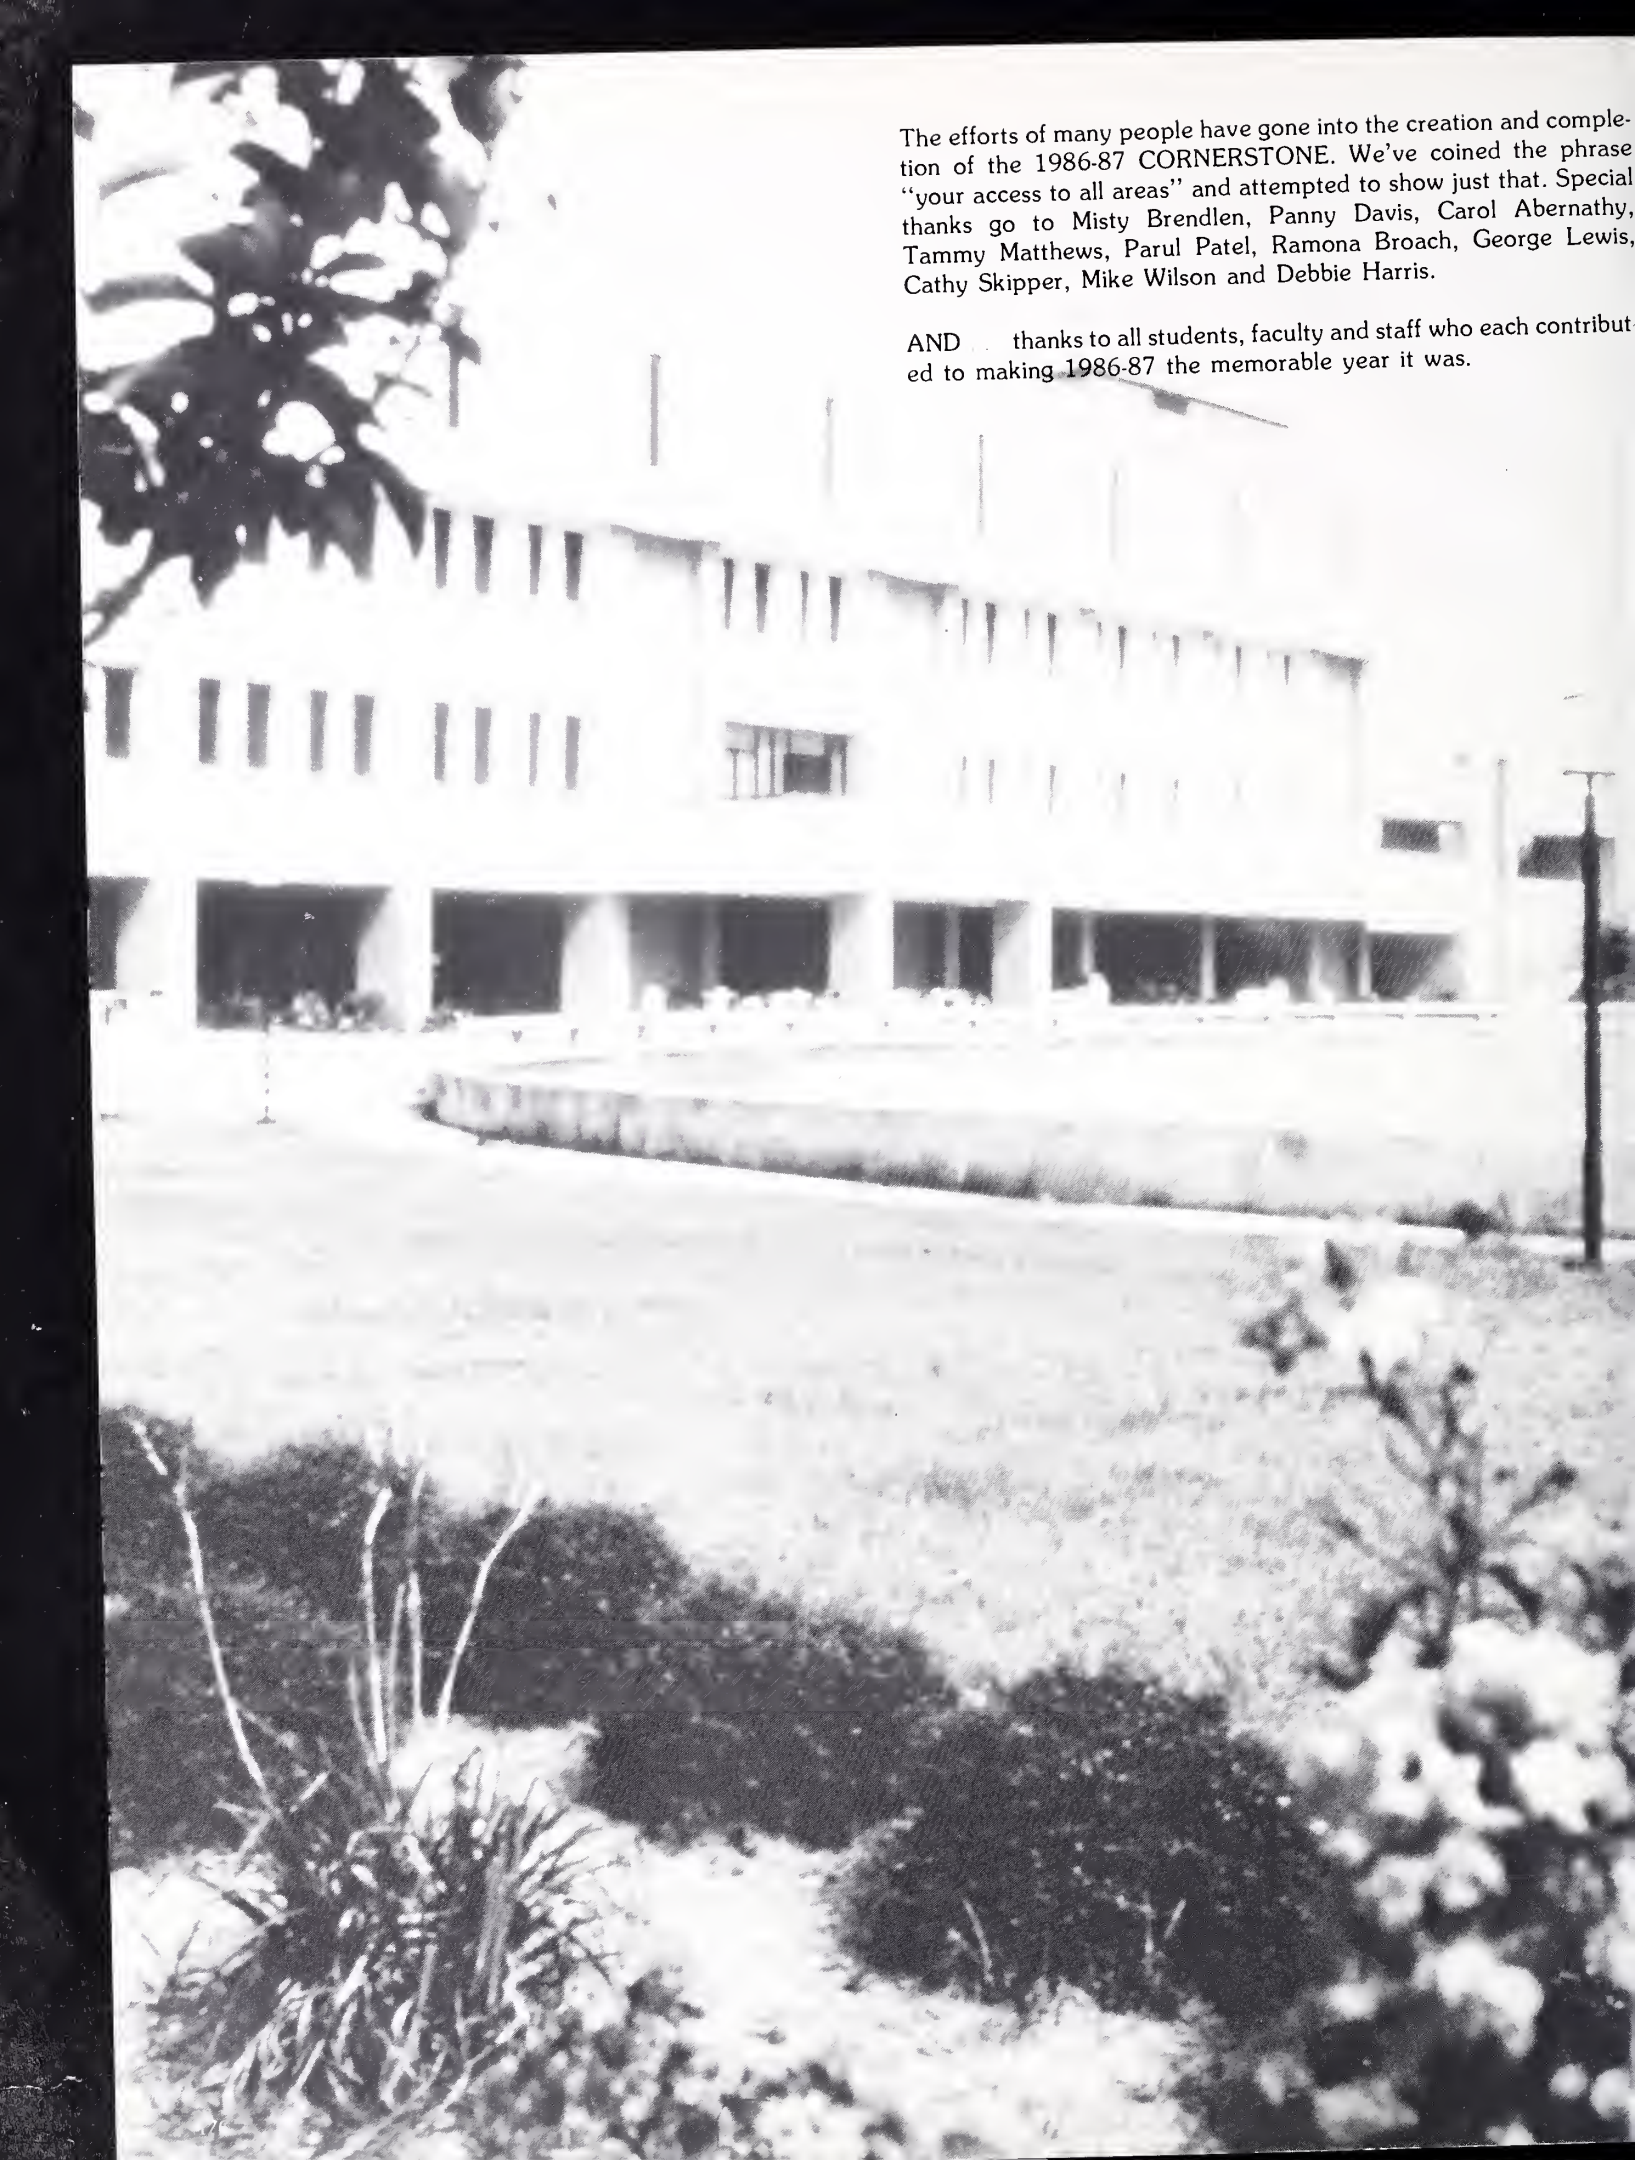

Classes studying research tests all four are a "must" for successful completion from any of Tech's programs. Securing employment is the primary goal for most Tech students. Through hard work and dedication to their curricula, these students gain to satisfying and rewarding careers. Tech truly is an "access!"

Access...

The efforts of many people have gone into the creation and completion of the 1986-87 CORNERSTONE. We've coined the phrase "your access to all areas" and attempted to show just that. Special thanks go to Misty Brendlen, Panny Davis, Carol Abernathy, Tammy Matthews, Parul Patel, Ramona Broach, George Lewis, Cathy Skipper, Mike Wilson and Debbie Harris.

AND thanks to all students, faculty and staff who each contributed to making 1986-87 the memorable year it was.
